About TT Bells

TT Bells combines the elegant softness of antiqua with a complex and daring temper reflected in straight stroke terminals and arrowheaded serifs. The family is based on broad nib, which was typically used for old style fonts and creates these hallmark terminals and serifs. We've taken the best from old style fonts created before the digital age and added sharp and contemporary geometric shapes to the traditional style.

TT Bells refers the spectators and font enthusiasts to the origins and, at the same time, reminds us that we live in the digital era when geometry and screens rule the world. TT Bells is suited for different types of text – from the shortest headings to large text arrays. When the font size is decreased, the boldness and sharpness of the font soften, it becomes more classic.

The fontfamily is created according to the traditional TypeType formula (Thin, Light, Regular, Bold, Black & Italics). We've also enabled the support of a broad number of OT features, which will help you widen the implementation range for this family: tnum, onum, pnum, numr, dnom, frac, case, ordn, subs, sups.

The Royal Navy disrupted France's extra-continental trade by seizing and threatening French shipping and colonial possessions, but could do nothing about France's trade with the major continental economies and posed little threat to French territory in Europe.

TT Bells
Regular 8 pt

France's population and agricultural capacity far outstripped that of Britain. Britain had the greatest industrial capacity in Europe, and its mastery of the seas allowed it to build up considerable economic strength through trade. This ensured that France could never consolidate its control over Europe in peace.

Ligatures

A standard ligature is functional in nature, and is created to solve the problem of characters that crash when set next to each other. A discretionary ligature is more decorative in nature and used at your discretion. Some discretionary ligatures combine frequently occurring letter pairs into a single graceful design.
