About TT Lovelies Script

Without any false modesty we can say that TT Lovelies Script is one of the most complicated projects we have ever carried out – there are 1115 glyphs, more than 2000 contextual alternates, 10000 kerned pairs and a large number of OT features, including ligatures and Old Style numbers. The most important characteristic of this font is that it's really seamless. We've done the impossible: in TT Lovelies Script, even capital letters are connected to lower-case letters without any breaks. The base for our typeface is original calligraphy by Russian designer Alena Korobanova.

The beautiful handwriting was painstakingly crafted into a fully functional font. TT Lovelies Script is a very lively and playful typeface with some unpredictable nuances.

Turn on the use of OT features CALT & DLIG in your graphic editor and use the font to the full. Every lower-case letter has characteristic pen strokes which begin and end a word. The pen strokes are turned on automatically when you accordingly type two hyphens at the begin- ning and at the end of a word. For instance, type '- - apricot - -' and you'll see the beautiful pen strokes at the beginning and at the end of the word.

TT Lovelies Script uses a great number of contextual alternates and ligatures which help maintain the handwritten impression. For each letter, a separate grapheme is created for the end of a line, and we've also integrated the Case Sensitive OT feature to make working with upper-case characters easier. We've enabled onum, sups, sinf, numr, dnom, frac, ordn as well in order to work with figures. To benefit from all of these wonderful options, you need to use software which supports OT features.

TT Lovelies Script 160 pt

Styles

TT Lovelies Script includes only the one typeface — handwritten script with a lot of OpenType feautures.

TT Lovelies Script

TT Lovelies Script

Examples

A number of species and many hybrid cultivars are grown in gardens or as potted plants.

TT Lovelies Script 50 pt

The tulip is a Eurasian and North African genus of herbaceous, bulbous plants in the lily family, with showy flowers. About 75 wild species are currently accepted.

TT Lovelies Script 32 pt

Examples

The genus's native range extends west to the Iberian Peninsula, through North Africa to Greece, the Balkans, Turkey, throughout the Levant (Syria, Israel, Palestinian Territories, Lebanon, Jordan) and Iran, north to Ukraine, southern Siberia and Mongolia, and east to the Northwest of China.

TT Lovelies Script 22 pt

Tulips are spring-blooming perennials that grow from bulbs. Depending on the species, tulip plants can be between 4 inches (10 cm) and 28 inches (71 cm) high. The tulip's large flowers usually bloom on scapes with leaves in a rosette at ground level and a single flowering stalk arising from amongst the leaves. Tulip stems have few leaves. Larger species tend to have multiple leaves. Plants typically have two to 6 leaves, some species up to 12.

Languages

Tulipa, más conocido como Tulipán, es un género de plantas perennes y bulbosas perteneciente a la familia Liliaceae, en el que se incluyen los populares tulipanes, nombre común con el que se designa a todas las especies, híbridos y cultivares de este género.

Spanish

Tulppaanit ovat sipulikasveja, joita viljellään niiden kauniiden kukkien takia. Viljejä tulppaaneja on noin sata lajia, ja ne ovat kotoisin Osmanien valtakunnan alueelta, Vähästä-Aasiasta tai kenties jopa Himalajan juurelta saakka. Viljeltyjä lajikkeita on tuhansia.

Finnish

Sztywna, prosta, gładka lub owłosiona i tylko u nielicznych gatunków i odmian jest rozgałęziona i wtedy roślina tworzy kilka kwiatów np. u Tulipa biflora, Tulipa tarda, Tulipa praestans czy Tulipa turkestanica. Niektóre odmiany jednopędowe mają skłonność do tzw. staśmień.

Polish

Tulipan, je rod od oko 150 biljaka u porodici ljiljana (lat. Liliaceae). Područje odakle potječu vrste uključuje jug Europe, sjever Afrike, te Aziju, tj. područja Anatolije i Irana, a najveći broj vrsta potječe iz stepa Kazahstana i okolice planina Pamira i Hindukuša.

a-- - a

The tulip's large flowers usually bloom on scapes with leaves in a rosette at ground level and a single flowering stalk arising from amongst the leaves. Tulip stems have few leaves. Larger species tend to have multiple leaves.

Ligatures

th - th

Plants typically have two to six leaves, some species up to 12. The tulip's leaf is strap-shaped, with a waxy coating, and the leaves are alternately arranged on the stem; these fleshy blades are often bluish green in color.

Contextual alternates

æ - æ

The flowers have six distinct, basifixed stamens with filaments shorter than the tepals. Each stigma has three distinct lobes, and the ovaries are superior, with three chambers. The tulip's seed is a capsule with a leathery covering.

About TypeType

TypeType company was founded in 2013 by Ivan Gladkikh, a type designer with a 10-year experience and Alexander Kudryavtsev an experienced manager. In the past 3 years we've released more than 40 fontfamilies, and the company has turned into a type foundry with
a harmonious team.

Our mission is to create and distribute only carefully drawn, thoroughly tested, and per- fectly optimized typefaces which are available to a wide range of customers.

Our team unites people who represent diffe- rent countries and continents. Thanks to such cultural diversity, our projects are truly unique and global.
