About TT Milks

Initially the idea for TT Milks was to create a collection of typefaces to be used for packaging and branding of dairy products. We've started by creating a main sans-serif and a supporting script, worked on their compatibility, and created an appropriate number of type weights. At the same time, while working on the initial idea, we've tested all possible glyph variations, which resulted in a large decorative designer font family. Thanks to a variety of elements, TT Milks collection has exceeded its initial idea and now offers an unlimited application range.

TT Milks type collection includes several subfamilies and consists of 26 typefaces:

- TT Milks Script subfamily is a satellite to the basic grotesk and features 5 weights. TT Milks Script subfamily consists of 848 glyphs and supports a lot of OT features
- In TT Milks Casual we've collected 6 typefaces – the unique Black called 900 in three degrees of roughness, and the Bold (700) with 3 degrees of roughness as well
- TT Milks Casual Script consists of two script faces with a different degree of roughness
- TT Milks Casual Shadow is a version with broader letter setting and shadow effects. There's a clean shadowed version, three variants of rough typefaces with shadows, and a rough shadowed inline typeface
- TT Milks Casual Pie is a special set of 5 typefaces which can be easily combined with each other using different layers
- TT Milks Outline completes the collection. It consists of a total of 3 amusing super-display typefaces – outline, outline shadow, and a cow pelt patterned typeface.

Examples

Whole milk is a good choice for small children aged 1-2 years and anyone else for whom fat intake is not a consideration.

TT Milks Script ExtraLight 16 pt

Reduced fat milk is whole milk in which the milkfat level has been reduced from 3.25% to 2% (hence its popular name, "2% milk").

TT Milks Script Regular 16 pt

Evaporated milk is made by heating homogenized whole milk under vacuum to remove about 60% of its water.

TT Milks Script ExtraBold 16 pt

Since evaporated milk contains no sweetener, it cannot be substituted for sweetened condensed milk.

TT Milks Casual Script One 16 pt

The addition of sweeteners adds calories to flavored milk. Chocolate milk contains about 60 calories more than unflavored milk.

TT Milks Script Light 16 pt

Flavored milk is milk to which a flavoring – such as cocoa or cocoa powder, strawberry or vanilla extract.

TT Milks Script Bold 16 pt

It is heat-treated (at 240-245 degrees F for 15 minutes) to sterilize it for prolonged storage.

TT Milks Casual Script Two 16 pt

Examples

THE HEALTH BENEFITS OF MILK INCLUDE STRONGER IMMUNE SYSTEM, INCREASED BONE STRENGTH, PREVENTION OF ILLNESSES.

TT Milks Casual 700 One 14 pt

TT Milks Script Regular 70 pt

Examples

TT Milks Script
Regular 42 pt

At about 25 cents per serving, milk is a low-cost option with nine nutrients essential to our health including protein, calcium.

TT Milks Script
Regular 32 pt

When Spanish missionaries traveled to Peru in 1553, they noted that the local population in Cuzco was drinking llama milk.

Examples

TT Milks Script
Regular 24 pt

Milk not only feeds you, but also feeds the bacteria in your gut and many nutrients in milk act as pre-biotics to keep your gut bacteria healthy.

TT Milks Script
Regular 18 pt

The combination of carbohydrates, fat, protein, and other micronutrients makes milk the premier recovery drink, possibly even more effective than commercially available sports drinks at promoting recovery from strength and endurance exercise.

TT Milks Script
Regular 12 pt

The most nutritious and best tasting milk comes from healthy animals that spend most of their time outdoors on fresh pasture eating lots of grass supplemented with hay, root veggies and grains. In theory, organic family farmers might be better stewards of land, water and food. Non-dairy milks are likely just as nutritious and better for the environment.

TT Milks Script
Regular 8 pt

Cow's milk is made up of 87% water and 13% solids, including minerals (like calcium and phosphorus), lactose, fats, and proteins (like whey, casein, lactalbumins). Fortification with vitamins A and D is necessary since natural levels are low. Casomorphins are derived from casein, one of the milk proteins. They have opioid (narcotic) properties (think morphine, oxycodone and endorphins).

Contextual alternates

TT Milks Script has a big pack of contextual alternates. They are activated for different letters pairs at the start, end of word and also inside of a word. All these changes help to achieve more ordered text.

Ligatures

fh - fh

The origin of typographical ligatures comes from the invention of writing with a stylus on paper or clay. People especially who needed a way to speed up the process of written communication found that conjoining letters and abbreviating words for lay use was more convenient for record keeping and transaction than the bulky long forms.

Case sensitive

{T} - {T}

The position of a number of punctuation marks like brackets, hyphens, slashes etc. is centred on the x-height of the lowercase letters. Fonts with case-sensitive punctuation also have slightly raised alternates of these characters that are centred on the cap height (the height of the uppercase).

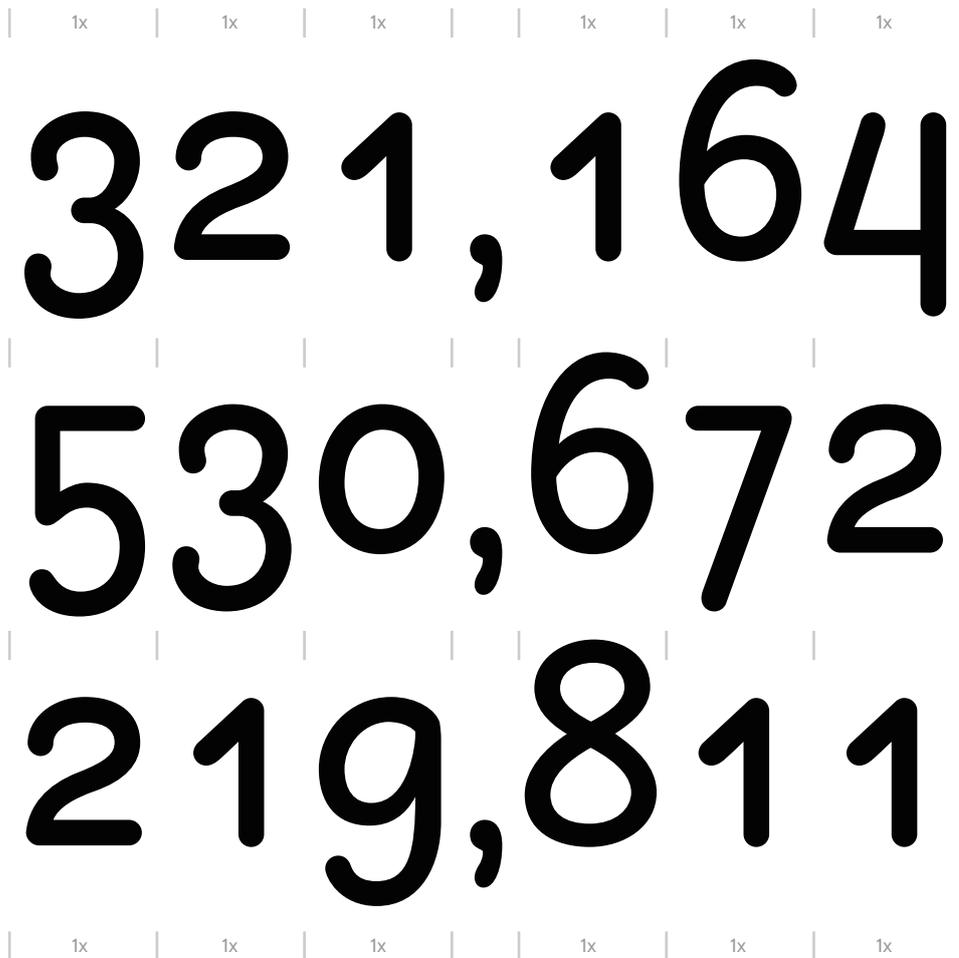

Ordinals

2^{ao} - 2^{ao}

There are also commonly encountered are the superscript (and often underlined) ordinal indicators ^o and ^a, originally from Romance, but via the cultural influence of Italian by the 18th century widely used in the wider cultural sphere of Western Europe, as in 1^o primo and 1^a prima "first, chief; prime quality".

Tabular Oldstyle Figures

Tabular figures have the same total width, so they don't mix with each other. The consistent width allows them to align vertically in financial statements, tables, and annual reports. Oldstyle figures option has many uses in modern typography. This elegant style is often preferred in running text.

About TypeType

TypeType company was founded in 2013 by Ivan Gladkikh, a type designer with a 10-year experience and Alexander Kudryavtsev an experienced manager. In the past 3 years we've released more than 40 fontfamilies, and the company has turned into a type foundry with a harmonious team.

Our mission is to create and distribute only carefully drawn, thoroughly tested, and perfectly optimized typefaces which are available to a wide range of customers.

Our team unites people who represent different countries and continents. Thanks to such cultural diversity, our projects are truly unique and global.
