About TT Barrels

TT Barrels is an elegant scotch style modern serif with strong industrial accents in its design. The TT Barrels project was born from a fictional technical assignment in which we tried to combine the technological effectiveness of industrial production used in engineering and the restrictions imposed by it with a beautiful scotch style serif. We decided to create a typeface that could be used to press letters on the metal body of a car, all while the typeface being elegant, and possessing sophisticated details that are typical of the classic text fonts of the late 19th and early 20th centuries.

In the process of designing and sketching, we reconsidered certain aspects and abandoned some of the requirements imposed by the technology of metal letter pressing, for example, from the extensive application of visual compensators, the decreased strokes contrast, and the hyperdeformation of individual letter elements to preserve a more pronounced rhythm of these elements. First of all, we wanted both to maintain the ease of reading for the entire text array and follow the rules of aesthetics of each letter in the typeface, while still leaving some influence of industriality.

In the end, this influence is best manifested in serifs, which are quite massive and have a technologically exaggerated wedge shape. TT Barrels consists of 12 fonts: Light, Regular, DemiBold, Bold, Extrabold, Black and the corresponding Italics. Each outline consists of more than 999 glyphs and includes small capitals, ligatures (for Latin and Cyrillic alphabets), stylistic alternates, old-style figures and many other useful features. The full list of OpenType features: `ordn`, `c2sc`, `smcp`, `case`, `frac`, `sinf`, `supr`, `numr`, `dnom`, `tnum`, `onum`, `lnum`, `pnum`, `dlig`, `liga`, `calt`, `salt` (`ss01`).

Examples

Barrels have a variety of uses, including storage of liquids such as water and oil, fermenting wine, arrack, and sake, and maturing beverages such as wine, cognac.

TT Barrels Light 16 pt

Most beverages are topped up from other barrels to prevent significant oxidation, although others such as vin jaune and sherry are not.

TT Barrels Regular 16 pt

Other wooden cooperage for storing wine or spirits range from smaller barriques to huge casks, with either elliptical or round heads.

TT Barrels DemiBold 16 pt

An "aging barrel" is used to age wine; distilled spirits such as whisky, or rum; beer; tabasco sauce; or (in smaller sizes) traditional balsamic vinegar.

TT Barrels Light Italic 16 pt

Some wines are fermented "on barrel", as opposed to in a neutral container like steel or wine-grade HDPE (high-density polyethylene) tanks.

TT Barrels Italic 16 pt

The tastes yielded by French and American species of oak are different, with French oak being subtler, while American oak gives stronger aromas.

TT Barrels DemiBold Italic 16 pt

Examples

To retain the desired measure of oak influence, a winery will replace a certain percentage of its barrels every year, although this can vary from 5 to 100%.

TT Barrels Bold 16 pt

The casks, or butts, are filled five-sixths full, leaving "the space of two fists" empty at the top to allow flor to develop on top of the wine.

TT Barrels ExtraBold 16 pt

Sherry is stored in 600-litre casks made of North American oak, which is slightly more porous than French or Spanish oak.

TT Barrels Black 16 pt

Bulk wines are sometimes more cheaply flavored by soaking in oak chips or added commercial oak flavoring instead of being aged in a barrel.

TT Barrels Bold Italic 16 pt

The law in the United States requires that "straight whiskey" must be stored for at least two years in new, charred oak containers.

TT Barrels ExtraBold Italic 16 pt

The typical bourbon barrel is 53 US gallons (200 L) in size, which is thus the de facto standard whisky barrel size worldwide.

TT Barrels Black Italic 16 pt

Supported languages

TT Barrels supports more than 72 languages including Western, Central, Northern European languages and most of cyrillic.

Whisky distiller
Jameson notably
purchases barrels
used by Franciscan
Well brewery.

TT Barrels
Regular 32 pt

Since its invention in
1868, the pepper mash
used to make Tabasco
sauce is aged for three
years in previously used
oak whisky barrels.

Examples

TT Barrels
Regular 24 pt

Cognac is aged only in oak casks made from wood from the Forest of Tronçais and more often from the Limousin forests.

TT Barrels
Regular 18 pt

Some types of tequila are aged in oak barrels to mellow its flavor. "Reposado" tequila is aged for up to one year, "Añejo" tequila is aged for up to three years, and "Extra Añejo" tequila is aged for at least three years.

TT Barrels
Regular 12 pt

This is most common in darker beers such as stout, which is sometimes aged in oak barrels identical to those used for whisky. Whisky distiller Jameson notably purchases barrels used by Franciscan Well brewery for their Shandon Stout to produce a whisky branded as "Jameson Caskmates".

TT Barrels
Regular 8 pt

Some of the liquid stored in a barrel is absorbed into the wood. The barrels can be more or less porous, depending on the wood; more porous woods allow more of the product to be absorbed. Humid conditions tend to make the barrel absorb that humidity, allowing less product to be absorbed. If an aging barrel is repurposed and used to store or age another product, the residue in the wood will then be leached into the new product.

About TypeType

TypeType company was founded in 2013 by Ivan Gladkikh, a type designer with a 10-year experience and Alexander Kudryavtsev an experienced manager. In the past 5 years we've released more than 40 font families, and the company has turned into a type foundry with a harmonious team.

Our mission is to create and distribute only carefully drawn, thoroughly tested, and perfectly optimized typefaces which are available to a wide range of customers.

Our team unites people who represent different countries and continents. Thanks to such cultural diversity, our projects are truly unique and global.
