About TT Commons

TT Commons is a universal sans serif with a minimal contrast of strokes, a closed aperture and geometric shapes of characters. The design of the typeface was developed for the widest possible range of tasks with which any quality corporate font is required to cope.

The history of TT Commons originates from the new TypeType logo, which appeared in late 2016 as part of the rebranding project. Ideas embedded in the logo formed the basis of two fully developed faces (regular and medium), which in early 2017 became the official corporate typeface of the TypeType Foundry.

Low contrast strokes and averaged drawing of letters makes TT Commons excellent for large arrays of text.

On the other hand, individually developed design of each glyph makes it possible to use it successfully as a display font.

The typeface intentionally does not have distinctive decorative details. On the contrary, it wins hearts with his laconism, simplicity and sharpness of forms, which set the seasoned corporate style for years to come. The name TT Commons comes from the word 'common' (widely accepted, typical, frequent) —this typeface can be used for any everyday tasks related to typography.

Font includes 9 upright and 9 italic typefaces with a small capitals, ligatures, stylistic alternates, arrows, different types of figures and other features (ordn, frac, case, c2sc, smcp, sinf, sups, numr, dnom, tnum, onum, etc.).

In 2019 we released updated and expanded version of TT Commons. What's new:

- The number of glyphs has been increased from 771 to 1434
- Number of OpenType features increased from 19 to 29
- Added math and additional currency symbols
- Entirely new hinting has been done
- Added Vietnamese language
- Cyrillic support extended
- Latin support expanded

If you are in doubt about which font to choose for you project, pick TT Commons, it will definitely work.

Variable versions

Updated font family also provides 2 additional variable versions: for uprights and italics. Variable option allows to change the weight and available on Character panel in Adobe Illustrator and Photoshop.

TT Commons **Var Roman**

TT Commons Var Roman 30 pt

*TT Commons **Var Italic***

TT Commons Var Italic 30 pt

Examples

While the north of the peninsula was already settled in the 7th–5th millennium BCE, the rest of its territory remained uninhabited until the 3rd millennium BCE.

TT Commons Thin 16 pt

By the end of the 19th century, the indigenous Sami population had been mostly forced north by the Russians as well as by newly arriving Izhma Komi and Kominized Nenets.

TT Commons ExtraLight 16 pt

The peninsula is covered by taiga in the south and tundra in the north, where permafrost limits the growth of the trees resulting in landscape dominated by shrubs and grasses.

TT Commons Light 16 pt

Soon after, the Pomors were followed by the tribute collectors from the Novgorod Republic, and the peninsula gradually became a part of the Novgorodian lands.

TT Commons Thin Italic 16 pt

Nevertheless, the economy rebounded somewhat in the first decade of the 2000s and the peninsula remains the most industrially developed and urbanized region in northern Russia.

TT Commons ExtraLight Italic 16 pt

It is located in the far northwest of Russia, almost completely inside the Arctic Circle and is washed by the Barents Sea in the north and the White Sea in the east and southeast.

TT Commons Light Italic 16 pt

Examples

Nevertheless, the economy rebounded somewhat in the first decade of the 2000s and the peninsula remains the most industrially developed region in northern Russia.

TT Commons Book 16 pt

Because the last ice age removed the top sediment layer of the soil, the Kola Peninsula is on the surface extremely rich in various ores and minerals.

TT Commons Regular 16 pt

Monsoon winds are common in most areas, with south winds prevailing in winter months and with somewhat more pronounced easterly winds in summer.

TT Commons Medium 16 pt

The peninsula is covered by taiga in the south and tundra in the north, where permafrost limits the growth of the trees resulting in landscape dominated by shrubs and grasses.

TT Commons Book Italic 16 pt

Deposits of construction materials such as granite, quartzite are also abundant. Diatomaceous earth deposits are common near lakes and are used to produce insulation.

TT Commons Italic 16 pt

Record highs exceed +30 °C (86 °F) almost on all the territory of the peninsula. First frosts occur as early as August and may last through May and even June.

TT Commons Medium Italic 16 pt

Examples

The peninsula is covered by taiga in the south and tundra in the north. In the tundra, cold and windy conditions and permafrost limit the growth of the trees.

TT Commons DemiBold 16 pt

Reindeer herds visit the grasslands in summer. Other animals include red and Arctic foxes, wolverines, moose, otters, and lynx in the southern areas.

TT Commons Bold 16 pt

Twenty-nine species of fresh water fish are recognized on the territory of peninsula, including trout, stickleback, northern pike, and European perch.

TT Commons ExtraBold 16 pt

In northern coastal areas, stony and shrub lichens are common. The taiga in the southern areas is composed mostly of pine trees and firs.

TT Commons DemiBold Italic 16 pt

American minks, which were released near the Olenitsa River in 1935–1936, are now common throughout the peninsula and are commercially hunted.

TT Commons Bold Italic 16 pt

The average temperature in July is about +11 °C (52 °F). Record lows reach -50 °C (-58 °F) in the central parts and -35 to -40 °C (-31 to -40 °F) on the coasts.

TT Commons ExtraBold Italic 16 pt

Examples

The rivers are an important habitat for the Atlantic salmon, which return from Greenland and the Faroe Islands to spawn in fresh water.

TT Commons Black 16 pt

Strong storm winds blow for 80–120 days a year. The waters of the Murman Coast remain warm enough to remain ice-free even in winter.

TT Commons Black Italic 16 pt

Supported languages

TT Commons supports more than 160 languages including Western, Central, Northern European languages and most of cyrillic.

Wybrzeża są słabo urozmaicone. Jest zbudowany z granitów, gnejsów i łupków krystalicznych, w jego zachodniej części znajduje się masyw Chibin (Judyczwumczorr 1200 m n.p.m.), w części południowej nizina przykryta osadami polodowcowymi. Przez półwysep przepływają liczne zasobne w energię rzeki: Ponoj, Warzuga, Umba i Jokanga.

Polish

Poloostrov má rozlohu přibližně 100 000 km². Severní břeh je vysoký a srázný, zatímco jižní břeh je nízký a mírný. V západní části poloostrova se rozkládají dvě pohoří Chibiny a Lovožské tundry (nadmořská výška do 1 120 m) a ve střední části se podél osy poloostrova táhne vysočina Kejvy (do 397 m), tvořící hlavní místní rozvodí.

Czech

Theo định nghĩa giới hạn hơn, bán đảo Kola có diện tích 100.000 kilômét vuông (39.000 sq mi). Bờ biển bắc thì cao và dốc, còn bờ nam thì bằng phẳng. Mạn tây của bán đảo có hai dãy núi: dãy Khibiny và Lovozero; điểm cao nhất bán đảo, đỉnh núi Chasnachorr (1.191 mét (3.907 ft)), nằm ở dãy Khibiny. Đường phân thủy Keyvy nằm ở phần giữa.

Vietnamese

Kuolan niemimaata asuttaa venäläisten lisäksi saamelaisten alkuperäiskansa. Kantalahden ympäristössä asuneet karjalaiset ovat toisen maailmansodan jälkeen käytännössä sulautuneet venäläisiin. Kuolaan muutti 1800-luvulla myös suomalaisia, jotka kuitenkin pakkosiirrettiin kesällä 1942 muualle Neuvostoliittoon toisen maailmansodan aikana.

Historically, due to its northern location, the peninsula's population had been sparse: in 1913, for example, only about 13,000–15,000 people lived there; mostly along the shores.

TT Commons
Regular 18 pt

Extensive poaching also led to the significantly reduced outputs from pearl hunting. However, commercial deer herding became more popular, although its share in the economy remained negligible until the 19th century.

TT Commons
Regular 12 pt

Peter the Great, recognizing the political and economical importance of the peninsula, promoted its industries and commerce; however, the region fell into neglect after St. Petersburg was founded in 1703 and most of the shipping trade shifted there. In 1732, large deposits of silver in native form were discovered on Medvezhy Island in the Kandalaksha Gulf.

TT Commons
Regular 8 pt

However, despite the efforts ongoing for the next two centuries, there was no commercial success. At the end of the 18th century, the local population learned the practice of peat production from the Norwegians and started using peat for heating. Timber cutting industry developed in the region at the end of the 19th century; mostly in Kovda and Umba. The Soviet era saw drastic industrialization and militarization of the peninsula. In 1925–1926, significant deposits of apatite were discovered in the Khibiny Mountains.

Proportional oldstyle

12 – 12

After the dissolution of the Soviet Union, the economy went into decline and the population quickly started to decrease. Between 1989 and 2002, Murmansk Oblast lost almost a quarter of its population; and almost 100,000 more between 2002 and 2010.

Tabular figures

12 – 12

The average temperature in January is about -10°C (14°F), with lower temperatures typical in the central parts of the peninsula. The average temperature in July is about $+11^{\circ}\text{C}$ (52°F). Record lows reach -50°C (-58°F) in the central parts and -35 to -40°C on the coasts.

Tabular oldstyle

12 – 12

By 1970, the population of the peninsula was around 799,000. The trend reverted in the 1990s, after the dissolution of the Soviet Union. The population of the whole Murmansk Oblast went down from 1,150,000 in 1989 to 890,000 in 2002 to 795,000 in 2010.

About TypeType

TypeType company was founded in 2013 by Ivan Gladkikh, a type designer with a 10-year experience and Alexander Kudryavtsev an experienced manager. In the past 5 years we've released more than 40 font families, and the company has turned into a type foundry with a harmonious team.

Our mission is to create and distribute only carefully drawn, thoroughly tested, and perfectly optimized typefaces which are available to a wide range of customers.

Our team unites people who represent different countries and continents. Thanks to such cultural diversity, our projects are truly unique and global.
