About TT Marxiana

TT Marxiana is a project to reconstruct a set of pre-revolutionary fonts that were used in the layout of the Niva magazine, published by the St. Petersburg publishing house A.F. Marx. In our project, we decided to focus on a specific set of fonts that were used in the preparation and printing of the Niva magazine in 1887, namely its Antiqua and Italic, Grotesque and Elzevir. As part of the TT Marxiana project, we sought to adhere to strict historicity and maintain maximum proximity to the paper source. As a result, with the TT Marxiana font family, a modern designer gets a full-fledged and functional set of different fonts, which allows using modern methods and using modern software to create, for example, a magazine in a design typical of the late 19th century.

The TT Marxiana project started in the late summer of 2018 and went beyond the traditional projects of TypeType because of the importance of preserving the historical identity. We had never before reconstructed the font from historical paper sources and with such a level of elaboration and attention to detail, it took us two years to implement this project. Drawing a font following the pages of a century-old magazine is a very difficult task. Such a font reconstruction very much resembles archaeological excavations or solving a complex cipher, and all these efforts are needed only in order to finally understand what steps need to be taken so that the resulting font is not just an antiqua, but the specific and accurate antiqua from Niva magazine.

An important task was to convey the feeling of typographic printing, but at the same time it was important to identify the common logic of the dot gains so that the font would form a harmonious, single, but at the same time lively picture. Since the Niva magazine was historically published in Russian there were not many Latin letters. There were no currency signs nor ligatures at all — we developed all these characters based on font catalogs of the 19–20 centuries. We came up with a feature that can be used to exchange modern Russian spelling for pre-revolutionary spelling. When this feature is turned on, yat and yer appear in the necessary places (i, ѣ, ъ, ѳ and ѵ), the endings of the words change, and so appears a complete sensation of the historical text.

El arte es entendido generalmente como cualquier actividad o producto realizado con una finalidad estética y también comunicativa, mediante la cual se expresan ideas, emociones y, en general, una visión del mundo, a través de diversos recursos. El arte es un componente de la cultura, reflejando en su concepción las bases económicas y sociales, y la transmisión de ideas y valores, inherentes a cualquier cultura humana a lo

Spanish

Kunst er en fellebetegnelse på menneskeskapte fenomener som blir laget for å dekorere og for å dele en opplevelse, fortelling eller følelse. Kunst dekker et stort mangfold av uttrykk, fra sang og dans (utøvende kunst), via diktning og skjønnlitteratur til maleri, skulpturer og arkitektur. Begrepet dekker både det å lage eller framføre kunstverket, tradisjonen det er laget i og institusjonene og mottakelsen av kunst

TT Marxiana Antiqua

TT Marxiana Antiqua is a scotch modern serif, the drawing of which carefully preserved some of the artifacts obtained by printing, namely dot gain, a slight deformation of the letters and other visual nuances. TT Marxiana Antiqua has an interesting stylistic set that imitates the old setting and in which some of the signs are made with deliberate sticking or roughness. Using this set will provide an opportunity to further simulate the setting of that great time.

TT Marxiana Antiqua consist of 625 glyphs each and and it has 23 OpenType features, such as: aalt, ccmp, locl, subs, sinf, sups, numr, dnom, frac, ordn, lnum, pnum, tnum, onum, salt, calt, liga, ss01, ss02, ss03, ss04, ss05, case.

TT Marxiana Antiqua 70 pt

Examples

TT Marxiana
Antiqua 42 pt

Thomas Edison being the first to invent a device that could both record sound and reproduce sound, in 1877.

TT Marxiana
Antiqua 32 pt

A gramophone (as a trademark since 1887) or since the 1940s called a record player, is a device for the mechanical recording and reproduction of sound.

Examples

TT Marxiana
Antiqua 24 pt

The sound vibration waveforms are recorded as corresponding physical deviations of a spiral groove etched, engraved, or impressed into the surface of a disc, called a "record".

TT Marxiana
Antiqua 18 pt

In early acoustic phonographs, the stylus vibrated a diaphragm which produced sound waves which were coupled to the open air through a flaring horn, or directly to the listener through stethoscope-type earphones.

TT Marxiana
Antiqua 12 pt

Several inventors devised machines to record sound prior to Thomas Edison's phonograph, Edison being the first to invent a device that could both record and reproduce sound. The phonograph's predecessors include Édouard-Léon Scott de Martinville's phonautograph, and Charles Cros's paleophone. Recordings made with the phonautograph.

TT Marxiana
Antiqua 8 pt

Edison's early phonographs recorded onto a thin sheet of metal, normally tinfoil, which was temporarily wrapped around a helically grooved cylinder mounted on a correspondingly threaded rod supported by plain and threaded bearings. While the cylinder was rotated and slowly progressed along its axis, the airborne sound vibrated a diaphragm connected to a stylus that indented the foil into the cylinder's groove, thereby recording the vibrations as "hill-and-dale" variations of the depth of the indentation.

TT Marxiana
Antiqua Italic 42 pt

Pyotr Ilyich Tchaikovsky was the first Russian composer whose music made a lasting impression internationally.

TT Marxiana
Antiqua Italic 32 pt

Pyotr Ilyich Tchaikovsky was a Russian composer of the Romantic period. Although musically precocious, he was educated for a career as a civil servant.

Examples

TT Marxiana
Antiqua Italic 24 pt

There was scant opportunity for a musical career in Russia at the time. Tchaikovsky entered the nascent Saint Petersburg Conservatory, from which he graduated in 1865.

TT Marxiana
Antiqua Italic 18 pt

Tchaikovsky displayed a wide stylistic emotional range, from light salon works to grand symphonies. Some of his works, such as the Variations on a Rococo Theme, employ a "Classical" form reminiscent of 18th-century composers.

TT Marxiana
Antiqua Italic 12 pt

Other compositions, such as his Little Russian symphony and his opera Vakula the Smith, flirt with musical practices more akin to those of the 'Five', especially in their use of folk song. Other works, such as Tchaikovsky's last three symphonies, employ a personal musical idiom that facilitated intense emotional expression.

TT Marxiana
Antiqua Italic 8 pt

Tchaikovsky kept the musical conversation flowing by treating melody, tonality, rhythm and sound color as one integrated unit, rather than as separate elements. Repetition was a natural part of Tchaikovsky's music, just as it is an integral part of Russian music. His use of sequences within melodies (repeating a tune at a higher or lower pitch in the same voice) could go on for extreme length. The problem is that the melody being repeated remains static, even when there is a surface level of rhythmic activity added to it.

TT Marxiana Grotesque

TT Marxiana Grotesque is a rather thick and bold old sans-serif. Its drawing also maximally preserved the defects obtained during printing and characteristic of its paper reference. In addition to pre-revolutionary spelling, TT Marxiana Grotesque has a decorative set with an inversion. This is a set of uppercase characters, numbers and punctuation, which allows you to type inverse headers, i.e. print white on black. This way of displaying was very characteristic for print advertising at the turn of the century. In addition, about 30 decorative indicator stubs were drawn for this set: arrows, hands, clubs, etc.

TT Marxiana Grotesque consists of 708 glyphs and it has 22 OT features, such as: aalt, ccmp, locl, subs, sinf, sups, numr, dnom, frac, ordn, lnum, pnum, tnum, onum, salt, calt, liga, ss01, ss02, ss03, ss04, case.

TT Marxiana Grotesque 70 pt

Examples

TT Marxiana
Grotesque 42 pt

François Auguste René Rodin (1840 – 1917) was a French drawing and sculptor generally considered the founder of modern sculpture.

TT Marxiana
Grotesque 32 pt

Rodin was schooled traditionally and took a craftsman-like approach to his work. Rodin possessed a unique ability to model a complex, and deeply pocketed surface in clay.

Examples

TT Marxiana
Grotesque 24 pt

Rodin's most original work departed from traditional themes of mythology and allegory. His famous sculptures are The Thinker, The Kiss, The Burghers of Calais, and The Gates of Hell.

TT Marxiana
Grotesque 18 pt

Many of Rodin's most notable sculptures were criticized as they clashed with predominant figurative sculpture traditions in which works were decorative, formulaic, or highly thematic. His sculptures celebrate individual character and physicality.

TT Marxiana
Grotesque 12 pt

Although Rodin was sensitive to the controversy surrounding his work, he refused to change his style, and his continued output brought increasing favor from the government and the artistic community. He modeled the human body with naturalism. Rodin's sculptures suffered a decline in popularity after his death in 1917, but within a few decades his legacy solidified.

TT Marxiana
Grotesque 8 pt

From the unexpected naturalism of Rodin's first major figure – inspired by his 1875 trip to Italy – to the unconventional memorials whose commissions he later sought, his reputation grew, and Rodin became the preeminent French sculptor of his time. By 1900, he was a world-renowned artist. Wealthy private clients sought Rodin's work after his World's Fair exhibit, and he kept company with a variety of high-profile intellectuals and artists. Rodin had enormous artistic influence. Rodin remains one of the few sculptors widely known outside the visual arts community.

TT Marxiana Elzevir

TT Marxiana Elzevir is a title or header font and is a compilation of monastic Elzevir that were actively used in the Niva magazine for all its prints. Unlike the antiqua, TT Marxiana Elzevir has sharper forms, and the influence of deformations from typographic printing is not as noticeable in the forms of its signs. This is primarily due to the specifics of its drawing and the fact that it was usually used as a heading font and was printed in large sizes. The height of the lowercase and uppercase characters of Elsevier is the same as the heights of the antiqua, but the font is more contrasting and lighter, it has a lot of white and a lot of sharp corners.

TT Marxiana Elzevir consists of 780 glyphs and it has OT features, such as: aalt, ccmp, locl, frac, tnum, onum, lnum, pnum, calt, liga, ss01, ss02, ss03, ss04, ss05, ss06, salt, c2sc, smcp, case.

Elzevir 42 pt

Romanticism was an artistic, literary, musical and intellectual movement that originated in Europe.

TT Marxiana
Elzevir 32 pt

In most areas Romanticism (also known as the Romantic era) was at its peak in the approximate period from 1800 to 1890.

Examples

TT Marxiana
Elzevir 24 pt

Romanticism was characterized by its emphasis on emotion and individualism as well as glorification of all the past and nature, and the medieval.

TT Marxiana
Elzevir 18 pt

It was embodied most strongly in the visual arts, music, and literature, but had a major impact on historiography, education, chess, social sciences, politics, and the natural sciences.

TT Marxiana
Elzevir 12 pt

The movement emphasized intense emotion as an authentic source of aesthetic experience, placing new emphasis on such emotions as apprehension, horror and terror, and awe—especially that experienced in confronting the new aesthetic categories of the sublimity and beauty of nature.

TT Marxiana
Elzevir 8 pt

Romanticism elevated folk art and ancient custom to something noble, but also spontaneity as a desirable characteristic (as in the musical impromptu). In contrast to the Rationalism and Classicism of the Enlightenment, Romanticism (or the Romantic era) revived medievalism and elements of art and narrative perceived as authentically medieval in an attempt to escape population growth, early urban sprawl, and industrialism.

About TypeType

TypeType company was founded in 2013 by Ivan Gladkikh, a type designer with a 10-year experience and Alexander Kudryavtsev an experienced manager. In the past 6 years we've released more than 40 font families, and the company has turned into a type foundry with a harmonious team.

Our mission is to create and distribute only carefully drawn, thoroughly tested, and perfectly optimized typefaces which are available to a wide range of customers.

Our team unites people who represent different countries and continents. Thanks to such cultural diversity, our projects are truly unique and global.
